Skills

Work History

2022-06 - 2023-06

Frontend Developer Internship
Frontend Simplified

- Transformed completely static HTML, CSS, JavaScript and React single page application into interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and GitHub interface to work and thrive in virtual and collaborative team environment

2023-06 - Current

Freelance Frontend Developer
Self Employed

- Delivered 2 professional websites using HTML5, CSS3 (+ SCSS, BEM), Tailwind CSS, JavaScript and React best practices
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world.

Harvard University - Online

📌 Projects

- **Twitter Clone:** I developed a Twitter clone with React.js, Firebase authentication for user management, showcasing front-end skills and integration expertise.
- **Article Summarizer:** I built this article summarize application using OpenAI's GPT model with a modern interface, connection to OpenAI's GPT model, integration of Redux Toolkit Query, functionalities like "copy to clipboard", "browser history storage" and many more.
- **[Movie API] (Week 6 Final Project):** In this project I used an API to fetch certain results depending on what you search for. I also used loading states as well as animations and reusable components.
- **Angular - Webshop:** In this project, I built an Angular Webshop using Angular, Node,js, TypeScript and Stripe. I used Angular material and Tailwind to structure the UI and integrated an store API into the app. I built a checkout and integrated Stripe to process payments.
